INTERNATIONAL SEARCH REPORT

International application No.

PCT/US04/10317

Box No. II	Observations where certain claims were found unsearchable (Continuation of item 2 of first sheet)
This internation	onal search report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons:
1.	Claims Nos.: because they relate to subject matter not required to be searched by this Authority, namely:
2.	Claims Nos.: because they relate to parts of the international application that do not comply with the prescribed requirements to such an extent that no meaningful international search can be carried out, specifically:
3.	Claims Nos.: because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a).
Box No. III	Observations where unity of invention is lacking (Continuation of item 3 of first sheet)
This Internation Please See Co	onal Searching Authority found multiple inventions in this international application, as follows: ntinuation Sheet
1.	As all required additional search fees were timely paid by the applicant, this international search report covers all searchable claims. As all searchable claims could be searched without effort justifying additional fees, this Authority did not invite payment of any additional fees. As only some of the required additional search fees were timely paid by the applicant, this international search report covers only those claims for which fees were paid, specifically claims Nos.:
4. E	No required additional search fees were timely paid by the applicant. Consequently, this international search report is restricted to the invention first mentioned in the claims; it is covered by claims Nos.: The additional search fees were accompanied by the applicant's protest and, where applicable, the payment of a protest fee. The additional search fees were accompanied by the applicant's protest but the applicable protest fee was not paid within the time limit specified in the invitation. No protest accompanied the payment of additional search fees.

BOX III. OBSERVATIONS WHERE UNITY OF INVENTION IS LACK	ING			
BOX III. OBSERVATIONS WHERE ONLY OF INVENTION IS EXCR.	1110			
This application contains the following inventions or groups of inventions which at concept under PCT Rule 13.1. In order for all inventions to be examined, the approximation of the concept under PCT Rule 13.1.	re not so linked as to form a single general inventive opriate additional examination fees must be paid.			
Group I, claim(s) 284 and 469-478, drawn to an apparatus and method for cutting a	ı tubular.			
Group II, claim(s) 298, 304-306, and 479-481, drawn to an apparatus and method f	or gripping a tubular.			
Group III, claim(s) 338-389, drawn to a method of expanding and deforming a tubu				
The inventions listed as Groups I do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the special technical feature of group I involves engaging a plurality of cutting elements with a tubular member; the special technical feature of group II involves engaging gripping elements within a tubular member; and the special technical feature of group III involves radial expansion of a tubular member by an expansion device.
